Multifunctional High-performance Milling of aluminum and non-ferrous metals

FRAISA – Your technology partner for
milling processes

Articles 8565, 8575 and 8585

MFC Alu

- ▶ Optimized chip breaker system
- ▶ High gloss-ground flutes
- ▶ Constant l/d ratios
- ▶ Increasing core diameter
- ▶ New high-performance penetration edge
- ▶ Smooth transitions
- ▶ Precise supporting chamfers
- ▶ Internal cooling channel
- ▶ Corner radius

Maximum chip removal rate, reduced production costs

Outstanding surface and component qualities

Shorter machine setup times for fast application

HDC capable and process reliable

Sustainable thanks to FRAISA ReTool® Services

Perfect application data
